

Blade Style Hand Dryers

Our blade style hand dryers collect the waste water ready to be disposed of later, unlike other blade style hand dryers on the market. Reducing any slipping hazard on the floor.

- The dryers use 80% to 90% less power than traditional style hand dryers
- 1600 watts brushless motor giving a shorter drying time and lower power consumption reducing your carbon footprint. Conventional hand dryers can take 30-40 seconds to dry hands.
- Blade style hand dryers are much quieter than convention style hand dryers.
- Made from ABS plastic. Hardwearing and germ resistant.
- Speed adjuster and power on/off switches.
- Blade hand dryers minimumise energy consumption.
- Internal filter to protect dust and dirt from being blown around the room.
